

# Pikachu Christmas Ornament

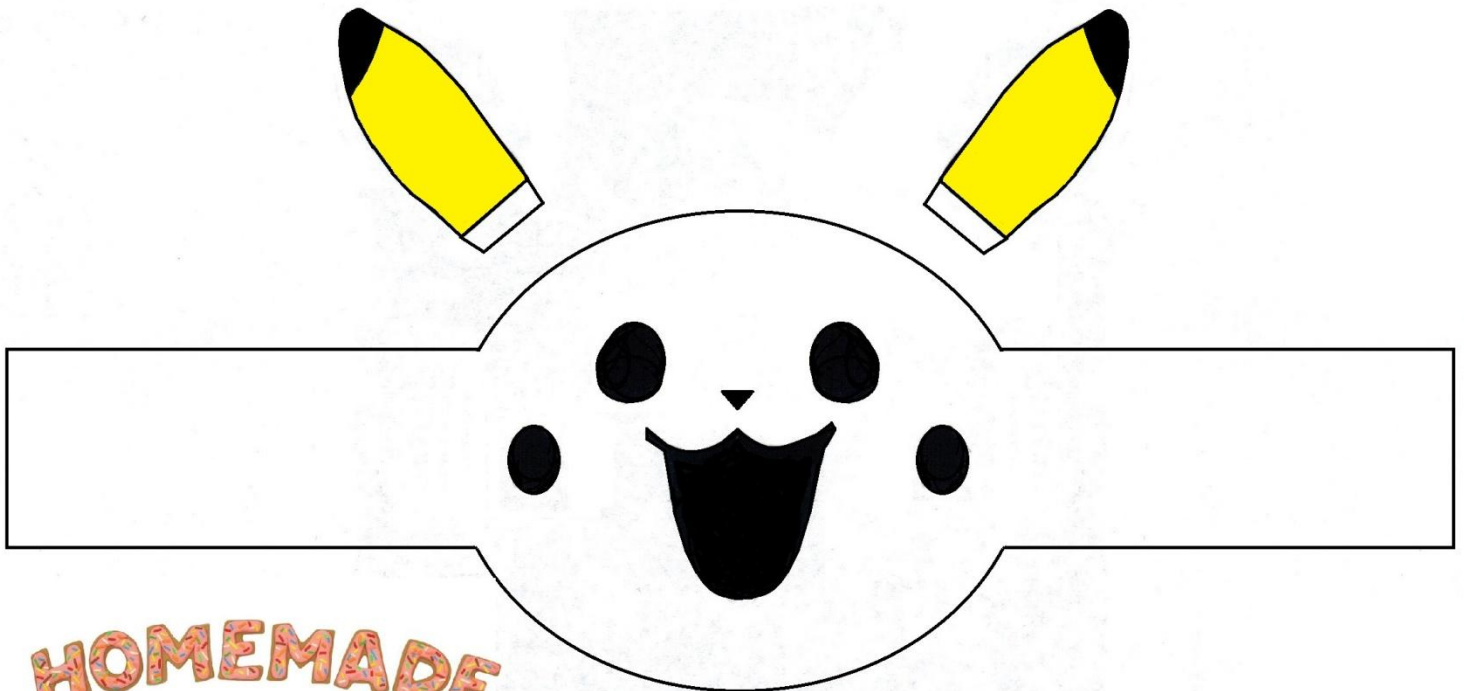

## Materials Needed:

1. Glass Christmas ball 2.5"
2. Acrylic Paints: yellow, black, white, light pink & dark pink (consider a black paint marker which may be easiest for outlining)
3. Stiffened felt: yellow
4. Glue
5. Black permanent marker

## Directions:

1. Pour yellow acrylic paint into glass ball, swirl around until entire interior of ball is covered. Let excess paint drain into disposable empty egg carton or paper cup. Let dry over-night.
2. Cut ears from felt, paint tips black.
3. Cut out paper pattern of Pikachu face, including holes for eyes, nose, cheeks and mouth. This will be the template to mark features onto glass ball. Gently hold template (or tape down if necessary) and use permanent marker to outline the facial features. Don't worry if you mess-up or if it's not perfect... the permanent marker easily wipes off & this step is mostly to pin-point where to place the eyes, nose, cheeks and mouth on the ball.
4. Remove pattern and touch up details to your liking.
5. Start painting!!! Fill in cheeks and back of mouth with dark pink. Fill in tongue with light pink. Use black paint or black paint marker to fill in eyes and outline mouth. Add white dots in eyes.
6. After completely dry, glue on ears and ENJOY your new poke-pet!
